

How to use the rideMe

- Download and extract the zip file
- Host a mySQL server with the credentials username: "root" and password: "root".
- Open Fullscript.sql and data.sql as query documents on the same server.
- Execute them in this same order.
- Ensure app.py is accessing the database using the same credentials.
- Run app.py
- Now follow the instructions on the screen and you are good to go.
